DIGITAL VS HUMAN

how we'll live, love, and think in the future

Richard Watson

The real problem of humanity is the following: we have palaeolithic emotions; medieval institutions; and god-like technology. And it is terrifically dangerous, and it is now approaching a point of crisis overall.

Edward O. Wilson

Anything that gets invented after you're thirty is against the natural order of things and the beginning of the end of civilisation as we know it until it's been around for about ten years when it gradually turns out to be alright really.

Douglas Adams

Qui vivra verra.

(Who lives will see.)

Contents

Preface: Taming the Future

1. Society and Culture: how we came to love our machines more than each other
2. Media and Communications: why instant communication is killing the art of conversation
3. Science and Technology: is it safe to build a parallel universe in your spare bedroom?
4. Economy and Money: is digital cash making us careless?
5. Healthcare and Medicine: can we ever acquire immunity against loneliness?
6. Automotive and Transport: where might self-driving cars eventually take us?
7. Education and Knowledge: what happens to learning when your teacher is an app?
8. Work and Employment: why the future might look a lot like the Middle Ages
9. Home and Family: remember when we lived and loved in analog?
10. Art and War: the search for (and submission to) something far larger than ourselves
11. Conclusions and Suggestions: a simple question that hardly anyone is asking
